

TABLE OF CONTENTS

Acknowledgements

1. The Future is Now!

Benefits

Youth Fitness: Past and Present

What is Fitness?

Nike is Right

The Fab Five of Fitness

Flexibility

Aerobic Fitness

Strength

Recovery

Proper Nutrition

Correcting the Problem

The School Environment

The Home Environment

Before Moving Ahead

2. The Muscles and How They Work

Common Joint Movements

The Major Muscles

Hips

Gluteals

Adductors

Iliopsoas

Upper Legs

Hamstrings

Quadriceps

Lower Legs

Calves

Dorsi Flexors

Torso

Chest

Upper Back

Shoulders

Upper Arms

Biceps

Triceps

Lower Arms

Forearms

Abdominals

Rectus Abdominis

Obliques

Transversus Abdominis

Lower Back

Erector Spinae

Neck

Neck Flexors

Neck Extensors

Trapezius

Final Thoughts

3. Enhancing Fitness through Flexibility

Benefits

Flexibility Factors

Anatomical Analysis

Methods of Stretching

Static Stretching

Active Stretching

Passive Stretching

Proprioceptive Neuromuscular Facilitation

Ballistic Stretching

Dynamic Stretching

Unsafe Applications

Unwanted Loading

Undesirable Positions

Unintentional Stress

Stretching Safely and Effectively

Stretching Strategies

Performance Points

Stretching the Lower Body

The Lower-Body Sequence

Stretches for the Lower Body

Standing Calf

Kneeling Tibia

Sitting Groin (or "Butterfly")

Lying Quad

Knee Stack

Lying Hamstring

Lying Glute

Stretching the Upper Body

The Upper-Body Sequence

Stretches for the Upper Body

Neck Forward

Neck Backward

Lateral Neck

Posterior Shoulder

Anterior Shoulder

Pec Stretch

Single Tricep

4. Conditioning for Aerobic Fitness

Benefits

FITT Principles

Frequency
Intensity
Time
Type

Additional Considerations

Supervision

6. Applications with Traditional Methods

Performance Points
Exercises for the Lower Body

Leg Press
Deadlift
Ball Squat
Hip Abduction
Hip Adduction
Prone Leg Curl
Seated Leg Curl
Leg Extension
Seated Calf Raise
Dorsi Flexion

Exercises for the Upper Body

Bench Press
Incline Press
Dip
Chest Fly
Bench Row
Lat Pulldown
Seated Row
Bench Row
Bent-Over Row
Overhead Press
Upright Row
Front Raise

- Lateral Raise
- Bent-Over Raise
- Shoulder Shrug
- Bicep Curl
- Tricep Extension
- Wrist Flexion
- Wrist Extension

Exercises for the Neck and Mid-Section

- Neck Flexion
- Neck Extension
- Sit-Up
- Crunch
- Side Bend
- Back Extension

7. Breaking Tradition

The Basics: A Quick Review

- Not Always the Case
- Recording Performance

Understanding the Concept A Different Approach

- Lifting, Carrying and Holding
- Dragging and Pulling

Tools of the Trade

- The Great Outdoors
- Ropes
- Sandbags
- Medicine Balls
- Stones and Rocks
- Sleds
- Bodyweight Apparatus

8. Applications with Non-Traditional Methods

Performance Points Exercises for the Lower Body

- Wall Sit
- Step-Up
- Lunge
- Front Squat
- Sled Drag
- Standing Calf Raise

Exercises for the Upper Body

- Chest Press
- Push-Up
- Row
- Chin-Up/Pull-Up
- Sled Pull
- Lift-n-Load
- Rope Hang
- Overhead Press
- Chest Carry
- Fireman's Carry
- Hammer Curl
- Tricep Extension

Exercises for the Neck and Mid-Section

- Neck Extension
- Plank Hold
- Suspended Crunch
- Spiderman Crunch
- Side Plank
- Romanian Deadlift

9. Putting it all Together

The "Training Week"
What about Aerobic Training?

Sequence of Activities

Progressive Demands

"Micro-Loading"

- Selectorized Machines
- Dumbbells

Incorporating Variety

- Change the Equipment
- Rearrange the Order
- Use Special Themes
- Have Different Workouts

Keeping Records
A Few Reminders
Crafting Workouts

Sample Workouts

10. Food for Thought

Poor Nutrition = Poor Health
Are There Differences?

Know the Source

What's Inside?

- Chemicals and Sweeteners
- Serving Size

The Six Critical Nutrients

Carbohydrate: The Preferred Source of Energy

- Simple Carbohydrates
- Complex Carbohydrates
- How Much?
- Don't Forget Fiber

Protein: A Requirement for Growth

- Complete Protein
- Incomplete Protein
- Biological Value
- How Much?

Fat: Yes, But the Right Kind

- Saturated and Trans Fats

Unsaturated Fat
Essential Fatty Acids
How Much?

Water: Hydrating for Health

H₂O
How Much?

Vitamins and Minerals: Small Amounts, Big Roles

Vitamins
Minerals

"Performance" Drinks

Sports Drinks
Fortified Water
Energy Drinks

Why the Concern?

Nutrition in Motion

How Many Calories?
How Many Meals
What about Snacks?

The Quest for Proper Nutrition

11. Addressing the Obesity Epidemic

Health Consequences
Terminology
